

CREATE AWARENESS WITH PEOPLE DATA

Predictive Success Academy Core Series

1/2 DAY VIRTUAL

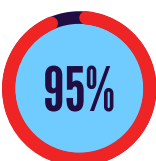

Pricing available upon request

What gives productive, high achieving teams a competitive edge? Collaboration. In our constantly changing, technology driven world, ensuring there is healthy collaboration within teams is critical to building a strong culture and delivering results. The key to getting there is people-smart and results-driven data, bolstered by greater self-awareness.

This fast-paced, half-day live virtual workshop offers bite sized insights and tools to help decode employee drives, understand their motivating needs, and consider how these play out in their virtual/in-person teams. Sessions are led by management consultants with an average of 20 years' experience who are experts in the discipline, in an accessible, easy-to-digest format. By the end of the session, attendees will be able to understand and interpret people data and apply the principles of talent optimization for employee development.

“ We are using the PI tool and really taking notice of what it's telling us. I really like the tool and find it is helping to take the guesswork out of our recruitment. Thanks again for the training.

-Shaun Alrey, CFO, Driving Change Automotive Group

of attendees rated the virtual training a 5/5 when asked about the impact they believe it will have on their day-to-day work within their organization.
